- There is a more detailed document on the website called "Course IV - Searching US Records for Your Immigrant Ancestors"

The Immigrant

The immigrant may be the toughest person in your family to research

- You have to identify the immigrant in the records of at least 2 countries
- You must find something in the records of 1 country that "connects" to contents of records in the other country to insure that you have identified "your John Smith"

The Immigrant

It is important to begin your research in the country they immigrated TO and eventually work your way back to the old country.

The Immigrant

Build up a body of knowledge about your immigrant and their

- Parents - did they immigrate?
- Spouse(s) - were they married in old country?
- Siblings - did they immigrate? were some children born in the old country?
- Children - Note sponsors for baptisms & marriages (sponsors of marriage and early children are often siblings)
- Also note other locals with the same surname and even other immigrants from the same country

US Research Goal

- To be in a position to identify the correct family in the old country, you need to find some of the following in US Resources:
 - 1 or more siblings of the immigrant
 - Possible Sources: Sponsors for Baptisms (search for all children of the immigrant) or census inventory
 - Immigrant's father's name and/or mother's maiden name or...
 - Location in old country

The Search

The Genealogical Proof Standard (GPS) was developed by the [Board for Certification of Genealogists](#). The GPS is a process to help us reach "correct" conclusions even when we cannot find original records.

1. **Reasonably exhaustive search**
2. Complete, accurate citations
3. Analysis and correlations of all source, information items, and evidence
4. Resolution of conflicts
5. A soundly reasoned, coherently written conclusion.

The Search

I suggest that when you are researching an immigrant that you should do an extremely exhaustive search.

Basic Name & Search Tips

- For names that can have prefixes, search indexes with & without. Examples: O', Mc, Mac, d', de, de la, di, van, von (& don't forget "phonetic" forms, ex: Magory for McGory)
- Don't assume 1 spelling of names when searching records
- Inconsistent punctuation in indexes:
 - VanWagner, Van Wagner
 - O'Flynn, OFlynn, O Flynn, O_Flynn, O.Flynn
 - McGrath, MacGrath, Mc Grath, M'Grath, Mgrath, Magrath

Basic Name & Search Tips

- Don't assume 1 given name is used in all records (nicknames/synonyms, middle names)
- Nicknames/synonyms: BJ, Delia or Biddy for Bridget
- For females, do a separate search with maiden name and with all married names.

Basic Google Search Tips

- If you're using google to search on names, must use 3 forms of the name:
 "john hogan" OR "john * hogan"
 OR "hogan john"
- When searching for foreign records, use country specific google extensions (see <https://rexttheme.com/google-country-codes-list/>). (For example, Irish content, use [google.ie](https://www.google.ie) instead of [google.com](https://www.google.com))
